It is in the public interest that the regulations contained in this article be adopted as public policy to promote the public health, comfort, safety, welfare and repose of the city and its inhabitants.

**Sec. 8-48. - Sound level limitations.**

No person shall cause, suffer, allow, or permit the operation of any sound source in such a manner as to create a sound level that exceeds the sound level limits set forth in Table 1 when measured at the real property line of the nearest receiving property using the slow response setting unless otherwise noted. Such a sound source would constitute a noise disturbance.

The actual sound pressure level (DBA) created by a noise source of interest shall calculated by determining the difference between the ambient or background sound pressure level (DBA) and the sound pressure level (DBA) with the noise source of interest and subtracting a scientifically determined (DBA) value from the sound pressure level with the noise source of interest as follows:

Receiving Property Category	Time	Sound Level Limit (DBA)
Residential	7 a.m.—10 p.m.	60
	10 p.m.—7 a.m.	55
Commercial	At all times	65
Industrial	At all times	70
